

Argweld® Argon Gas Feed Hose and Fittings

Frequently Asked Questions

- 1. Do I have to attach the fittings to the hose myself?**

No, the hose comes complete with the fittings crimped onto each end.
- 2. I require a length of hose not shown on the price list, is this possible?**

Yes, contact our sales dept with your desired length and they will quote a price.
- 3. Is there a maximum length?**

Yes, 100m is the longest length in a straight run, however longer lengths can be made up with joining connectors.
- 4. Is the hose stamped with the specification?**

Yes, each length of hose is marked in white ink along the length with the specification: Argon Gas Hose BS EN 559 20 Bar (300 PSI) WP-MM.ID.
- 5. Do you keep good stocks for next day delivery?**

Yes, we have hose and all fittings in stock and lengths can be made up quickly by our assembly team.
- 6. Can I purchase the fittings separately if required?**

Yes, all fittings can be bought individually, see our price list for details.
- 7. Does the hose have a British Standard?**

Yes, it is BS EN 559.
- 8. What is the temperature resistance range of the hose?**

From -30° up to +80°C.
- 9. Is the hose just for argon?**

No, it can also be used for nitrogen.
- 10. How much does it weight?**

0.16 kgs per metre.
- 11. What are the dimensions of the hose?**

The ID is 6 mm and the OD is 13 mm.
- 12. What is the maximum pressure rating of the hose?**

Working pressure is 300 psi, 20 bar.
