

Flexible Welding Enclosures®

Advantages of Use

- Operator comfort and easy to set-up and use.
- Relatively low cost.
- Fast and easy purge.
- Bright, shiny, oxide free welds.
- Can be set up temporarily if required and put away when not in use.
- Completely portable: can easily be taken to various locations if required.
- Fast delivery.
- Thousands in use all over the world.
- Excellent for stainless steel components as well as for titanium parts.
- Any number of glove ports can be installed if two pairs are insufficient.
- Standard dome style available off-the-shelf. Bespoke, tailor-made versions can be designed and manufactured within 8 weeks.
- Enclosures of all sizes for Additive Manufacturing and Robotic welding applications.
