

HFT PIPESTOPPERS®

HFT Pipestoppers® Inflatable Low Profile Stoppers

- Single ended **Inflatable Low Profile Stoppers** for pipes, ducts and other shaped orifices.
- These Inflatable Stoppers provide an excellent grip in the pipe with an effective all round seal.
- Manufactured for pipe diameters from 6 - 88 inch (152 mm up to 2235 mm).
- The **Low Profile Stoppers** are heat resistant up to 80°C (176°F).
- Each Stopper is fitted as standard with a Schrader Valve connected to a 1.2m hose, which means it can be easily inflated and deflated inside the pipe.
- Four pull tags are located around the circumference of the **Low Profile Stopper**. This means rope, pull wires or slings can be attached for retrieval of the deflated system if required.
- A secure method of blocking pipe ends to keep gases inside or to keep debris and vermin out.
- In a vertical mode, they are ideal to prevent machining swarf or tools from falling into pipes or orifices into unrecoverable situations.
